

Axetris, a company of the Leister group (www.leister.com), has developed a laser gas analyzer based on proprietary enhanced Tuneable Diode Laser Spectroscopy (TDLS). Our OEM module enables companies without laser spectroscopic expertise to benefit from the advantages of this fascinating gas detection technology. Our Laser Gas Detector solves challenges in emission monitoring, process control, leak detection, medical and many other applications.

To strengthen our sales team, we are looking for a

Sales Manager Laser Gas Detection

You acquire new customers and develop existing ones in Europe. You find and develop applications and markets for our current OEM module and for future customer specific developments. Your good technical understanding of our products is important for our demanding customers who expect excellent service. This position requires an intensive and good cooperation with the engineering team and the product manager. You work out of our headquarters in Central Switzerland, traveling time is typically 25 – 40 %

You have been successfully working in international sales of complex technical products, ideally in the emission monitoring (CEMS), process control, or environmental monitoring markets, preferably with gas analyzers or related products. It goes without saying that this position requires an excellent customer and serving behavior and a good sense of business. You own a master degree in engineering or equivalent. It is a plus if you have a good understanding of laser spectroscopy or other optical detection methods and/or gas analyzers. We expect a good sense of business.

Working location: Switzerland
